Give your practice a critical head start for 2016

A wave of change is about to crest. Position your practice or facility to ride out the ICD-10 transition, CPT® and HCPCS changes, and a myriad of compliance mandates with the resources you’ll find in DecisionHealth’s 2016 Product Catalog.

Be sure to ready your team and supercharge your ICD-10 training with the everyday ICD-10 coding tools they’ll need with DecisionHealth’s PIVOT to ICD-10 training courses and desk reference guides, including the original ICD-9 to ICD-10 Code Mappers and the Plain English Descriptions of ICD-10-CM Codes.

And, we’re doing more of what we do best — supercharging the relevancy of revenue cycle guidance by producing specialty-specific content — with new product launches in orthopedics, cardiology, ophthalmology, OB/GYN and general surgery.

NEW! The 2016 Illustrated Coding & Billing Expert product series (see page 6) provides essential CPT-to-ICD-10 crosswalks, plus the payment and coverage specifics — AMA guidelines, procedure definitions, RVUs, NCCI edits, Pub. 100 references — to ensure you can optimize your CPT code selection for full reimbursement.

Use these resources and more with DecisionHealth 2016 CPT, ICD, and HCPCS code books. Not only are we unveiling an exciting new cover design as the final celebration of the DecisionHealth integration of Contexo Media, the DecisionHealth family of products offers your staff an array of unique features, proprietary tips and enhancements that customers rave about, including:

✓ Documentation Finder – This industry-exclusive feature designed for today’s audit-intensive environment sets DecisionHealth’s Procedural Coding Expert manual apart! (pg. 4)

✓ Coding Tips – find nearly 400 tips, more than any other code book, in our 2016 ICD-10-CM Expert coding manuals (pg. 5). Just one of the reasons you don’t want to rely on ICD-10 draft manuals.

Give your practice a critical head start for 2016. With ample time to prepare and adjust to new compliance requirements, you’re sure to prosper.

2016 Procedural Coding Expert

MPB-PCE-16 | $114.95
2016 EDITION: SHIPS DECEMBER

Designed to make CPT® coding as accurate as possible, this is hands-down the best procedural coding resource in its class. Elegant in design, it now features an exclusive Documentation Finder to highlight necessary coding requirements, plus reimbursement aids including a High Risk Denial alert icon, Medically Unlikely Edits (MUE), and RVUs noted at the code level. And it’s loaded with proprietary coding tips, Medicare coverage rules, modifiers, and global billing information that are integral to code on a daily basis.

Go beyond the regular CPT manual; choose the code book with exclusive tips, indicators and features that will allow greater coding clarity, optimize reimbursement and lessen denials.

2016 AMA CPT® books also available!

AMA CPT® 2016 Professional

MPB-CPTPRO-16 | $114.95
2016 EDITION: SHIPS SEPTEMBER

AMA CPT® 2016 Standard

MPB-CPTSTND-16 | $89.95
2016 EDITION: SHIPS OCTOBER

Finally, code books that support documentation and reimbursement.

- **2016 HCPCS Level II Expert**
  - MPB-HCPCS-16 | $109.95 | SHIPS DECEMBER
  
  Ensure you’re using the most up-to-date HCPCS Level II codes and properly submit claims to the DME or Part B MAC. If you’re billing for durable medical equipment (DME), injections, Medicare services, drugs and medical supplies, this resource will immediately help you identify the correct HCPCS Level II code and identify which codes are on the Medicare DME fee schedule and paid by the DME MAC.

- **2016 ICD-10-CM Expert for Physicians**
  - MPB-MICD10-16 | $109.95 | SHIPS SEPTEMBER

- **2016 ICD-10-CM Expert for Hospitals/Payers**
  - MPB-ICD10HP-16 | $109.95 | SHIPS SEPTEMBER

- **2016 ICD-10-PCS Expert**
  - MPB-ICD10PCS-16 | $109.95 | SHIPS AUGUST

**Code-Ready Features:**

- All codes listed with placeholder Xs done for you!
- More than 350 Coding Tips!
- ICD10 Guidelines excerpted at the code!
- More than 100 Code Definitions!
- 40 full-page, color anatomy illustrations!
- Icons and color coding!
New! Specialty Illustrated Series

2016 Illustrated Coding and Billing Expert

$179.95 | SHIPS DECEMBER

This all-in-one resource is the perfect companion when using CPT® codes in a specialty practice setting. Plain English descriptions of each CPT code, CPT to ICD-9-CM crosswalks, CPT to ICD-10-CM crosswalks, illustrations, guidelines, RVUs, CCI edits, and make claims coding more efficient than ever. This is the code book you’ll be reaching for again and again for use on a daily basis.

Gain coding clarity with Plain English guidance

2016 Plain English Descriptions for ICD-10-CM
MPB-PED10-16  |  $129.95
2016 EDITIONS: SHIP OCTOBER  |  2015 EDITIONS: AVAILABLE NOW

Increase ICD-10-CM coding accuracy with added clarification. Inside, you’ll find each code is defined by both the actual description and a Plain English description. Detailed, full-page anatomy illustrations and thorough information on the Official Coding Guidelines help to broaden understanding of what you’re coding and why. This book mirrors the numerical arrangement of the official ICD-10-CM code set for easy identification.

2016 Plain English Descriptions for Denial Codes
MPB-PEDDENY-16  |  $129.95
2016 EDITION: SHIPS OCTOBER  |  2015 EDITION: AVAILABLE NOW

Decipher denied claims, develop solutions and appeals, and train your staff to avoid the problems that caused the denials in the first place. Inside you’ll find Plain English explanations for Remittance Advice codes and more, plus the action steps to quickly resolve the issues delaying your reimbursement.

2016 Plain English Descriptions for Procedures
MPB-PEDCPT-16  |  $129.95
2016 EDITION: SHIPS DECEMBER  |  2015 EDITION: AVAILABLE NOW

Increase coding accuracy with Plain English descriptions for more than 8,000 CPT® codes, complete code descriptions, detailed anatomy illustrations and procedure illustrations. Get the clarification you need to choose the correct code, every time.

66130
66130  Excision of lesion, sclera

Lesions of the sclera are usually benign in nature. They can include pingueculae found most often in the open space between the eyelids and characterized by a yellowish color and slight elevation. Pigmented lesions that arise from melanocytes and non-melanocytes can be acquired or congenital. Scleral lesions may be removed for cosmetic reasons or when they become enlarged and cause discomfort. A topical ophthalmic anesthetic is applied and the eye is prepped with an antibacterial solution. An eyelid speculum is inserted and the lesion is excised. Separately reportable tissue grafting may be performed to repair the surgical defect resulting from the excision. At the conclusion of the procedure, the cytotoxic (anti-cancer) drug Mitomycin C may be applied briefly to reduce scarring and then flushed away.

66150
66150  Fistulization of sclera for glaucoma; trophonialtion with iridectomy

The physician creates a new drainage tube for eye fluids through the fibrous covering of the eye. This is done to treat a condition in which fluid drains from the front chamber of the eye.

Discover the SelectCoder difference

- **Code faster**
  Simple screens let coders move quickly and process more claims.

- **Transition smoothly**
  Unmatched expert ICD-10 guidance.

- **Minimize denials**
  Support to validate code choices.

- **Bridge knowledge gaps**
  Build an expert staff with exclusive content.

Empower your coding decisions with exclusive guidance you won’t find in any coding application:

1. **Coder’s Scope™ Descriptions** – Procedure descriptions offering dual vantage points of clinical synopsis and steps needed to decide appropriate codes.

2. **Documentation Finder™** – Medical record essentials; terminology synonyms, supporting tests essential to medical necessity, and target words auditors seek.

3. **Denial Risk Monitor** – Code-level trends show payment risks based on real Medicare Claims processing data.

4. **DecisionHealth articles tipsheets and expert answers** to real-world coder questions indexed at the code level.

Plan and Prepare focused training
- Build awareness by specialty
- Conduct baseline skills gap assessment to target training

Implement training
- Introduce coders and clinicians to the language and logic of ICD-10
- Establish new documentation specificity with physicians

Validate ability to apply knowledge
- Test readiness of coders and clinicians
- Provide opportunity for scenario practice and dual coding

Operate in a daily ICD-10 coding workflow
- Introduce ICD-10 codes to daily workflow
- Dual code records to get used to using new codes, ramp productivity
- Update superbills and other coding cheatsheets
- Conduct pre-billing audits on dual coded claims

Track coding accuracy and compliance
- Track use of unspecified codes and documentation to support code selection
- Monitor and manage claims denials with remedial training
- Continue periodic staff assessments to identify skills gaps and need for remedial training
- Monitor ICD-10 developments, clarification and best practice guidance

The transition strategy, tools and resources you need to be ready for ICD-10

 Guarantee a seamless, efficient and cost-effective transition to ICD-10 with DecisionHealth’s PIVOT to ICD-10 Program. We’ll guide you step-by-step through the five phases of your ICD-10 transition — to ensure your organization is prepared.

Ready to get started?
Look for the [PIVOT logo] on the products and services on the next few pages and begin to build your PIVOT program. Or call us toll-free at 1-855-CALL-DH1 and a PIVOT representative will help you map your custom program. Visit www.decisionhealth.com/PIVOT for more details!
Save 30% with ICD-10 training bundles!

Train today and save! Visit www.codingbooks.com to order.
Ensuring proficiency in anatomy and physiology will be essential for coding in ICD-10. Unlike other anatomy & Physiology books, this guide is written specifically for coders to empower coding decisions.

Inside you’ll find full-page illustrations to help you understand laterality and specificity, detailed reviews of each body system, quizzes at the end of every chapter, hundreds of coding practice exercises, and comparisons of ICD-10-CM to ICD-9-CM Guidelines.

The ability to properly and fully assign more detailed ICD-10-CM codes hinges on solid documentation. In this how-to guide for coders and physicians, you’ll find all the tools required for an effective documentation analysis and a corrective action plan, including:

- Comprehensive review of each ICD-9-CM chapter and the corresponding ICD-10-CM chapter
- An ICD-9-CM to ICD-10-CM comparison of code categories and subcategories
- Condition-based crosswalks of ICD-9-CM to ICD-10-CM codes
- Scenarios showing required documentation in ICD-10-CM
- End of chapter quizzes
- Specialty-specific documentation checklists

This is the ideal tool for coders of all levels to sharpen their ICD-10-CM coding skills. This book includes coding scenarios and case studies based on actual healthcare encounters to help both students and experienced coders apply their understanding of correct ICD-10-CM coding. In all exercises, coders will need to apply the pertinent coding principles, conventions and guidelines in code selection and assignment of the principal and secondary diagnoses.

Updated for new ICD-10 Guidelines!

Dozens of new scenarios added!
ICD-9-CM to ICD-10-CM crosswalks

2016 ICD-9-CM to ICD-10-CM Diagnostic Code Mappers for Specialties

$28.95  |  2016 EDITIONS: SHIP SEPTEMBER  |  2015 EDITIONS: AVAILABLE NOW

Each specialty diagnostic code mapper has four full pages containing the top reported ICD-9-CM diagnoses codes, mapping them to ICD-10-CM codes for each specialty. These fast, convenient and reliable tools are perfect for training!

ICD-10-PCS Root Operations Flash Cards

ITEM # H5687  |  $14.95
SHIPS IN 24 TO 48 HRS

Test your knowledge of ICD-10-PCS key terms, explanations, examples and definitions with the aid of flash cards. Each set of durable and portable 3"x4" ring-bound cards:

- Addresses 31 root operations from the medical/surgical section
- Clearly indicates operations by type of procedure
- Fits easily in your pocket or bag
The fastest, easiest and most convenient path to ICD-10

Comprehensive training customized for every member of your organization

- **Clinicians.** We know how hard it is for busy physicians and NPPs to find time to sit down for hours of ICD-10-CM training. That’s why we’ve broken down our physician-led clinician training courses into 20-minute modules so your clinical staff can train on their schedule, on the topics most relevant to their role in ICD-10.

  *CMEs/CNEs available*

- **Coders.** Your coding staff will bear the biggest burden. Take their ICD-10 knowledge beyond the basics with courses filled with comprehensive guidance and in-depth scenario work. Ensure their readiness on Day 1.

- **Specialty Coding Staff.** General ICD-10 training won’t be enough. Overcome the specific challenges your specialty practice will face in ICD-10-CM with unique training pathways for Anesthesia, Pain Management, Orthopedics, OB/GYN, ENT, General Surgery and Cardiology.

- **Medicare Pathway.** This pathway covers key Medicare guidelines and regulations for coding and reimbursement, such as provider enrollment, the National Correct Coding Initiative (NCCIs), the Medicare Physician Fee Schedule (MPFS), coverage for preventative services and other coverage policies.

- **Compliance Pathway.** Keep your practice compliant with this 6-hour pathway that includes instruction on the OIG Workplan, HIPAA, compliance auditing and monitoring and compliance planning.

- **E/M Coding Pathway.** The Evaluation and Management pathway includes all aspects of E/M coding, covering each of the different types of codes available, the elements required for each of the types, and the modifiers that may be included when submitting claims for reimbursement.

**DecisionHealth University** provides pre-approved continuing education programs and training tailored to the unique needs of each practice. Learn at your own pace from subject matter experts and validate your skills at the end of each course. Plus, with courses geared toward clinicians, coders, and specialty coding staff, you’ll find training the entire staff needs.

**Why choose DecisionHealth University?**

- Learn at your own pace
- Training by subject matter experts
- Validate skills at the end of each course
- Earn CEUs from AAPC, AHIMA, BMSC
- Affordable and risk-free
Complete training pathways or single courses to suit your individual needs

### Clinician Pathway
Sample courses include:
- Behavioral and Psychological Disorders
- Cardiovascular Diseases and Disorders
- Vascular Diseases and Disorders
- External Causes
- Metabolic and Nutritional Diseases and Disorders
- Neoplasms
- Other Injuries – Part I
- Pregnancy, Delivery and Pueperium

### ICD-10-CM Coding Pathway
Sample courses include:
- Understanding and Preparing for ICD-10-CM
- ICD-10 Preparation for Healthcare Professionals: The CM Guidelines
- Anatomy and Terminology Essentials from an ICD-10-CM Perspective
- ICD-10-CM Documentation and Compliance Fundamentals for Healthcare Professionals
- Common Coding Scenarios: A Practicum in ICD-10-CM Coding and Documentation

### ICD-10-PCS Coding Pathway
Sample courses include:
- Understanding and Preparing for ICD-10-PCS
- ICD-10 Preparation for Healthcare Professionals: The PCS Guidelines
- Anatomy and Terminology Essentials from an ICD-10-PCS Perspective
- Coding from the Operative Report: a Practicum in ICD-10-PCS Coding and Documentation

### Medicare Pathway
Sample courses include:
- National Correct Coding Initiative (NCCI)
- Medicare Physician Fee Schedule (MPFS)
- Medicare Provider Enrollment
- Medicare Preventative Services

### Compliance Pathway
Sample courses include:
- OIG Overview and Work Plan
- HIPAA
- Auditing and Monitoring
- Compliance Planning

Visit [www.codingbooks.com](http://www.codingbooks.com) or call 1-855-885-0192 for course details
Win contract negotiations, set competitive changes and create custom fee schedules in minutes!

Rely on the best physician charge data available to improve contract negotiations and ensure you are operating at the most competitive level possible!

Plus, easily create Excel and PDF-readable custom fee schedules for your specific localities, with fees based on Medicare or carved out separately, in minutes. Unlike other fee estimators on the market today, FeeCalc gives you nationwide real-time charge data — no extra costs for non-local ZIP areas!

Optimize your reimbursement with FeeCalc

▶ Ensure competitive charge-setting
Using FeeCalc, you can compare your charges against local peers to set your charge master with precision and identify where your practice may be missing opportunities to adjust fees – up or down. Even the slightest increase or decrease in your charges can lead to more revenue and more patients in the waiting room.

▶ Improve out-of-network patient revenue
Charge data helps determine how much the provider is paid for seeing out-of-network patients. Most commercial payers state that they pay non-participating providers at the 80th percentile charge amount in a market. But how do you know what that amount is? Using FeeCalc, you can see the dollar charges for each service you set using percentile data to give you the full picture, guaranteeing you know whether payers are paying fairly and ultimately improving your out-of-network revenue.

▶ Empower contract negotiations
The charge amount is often the starting point that payers and providers use to reach the final contracted rate. Having access to FeeCalc’s charge data reveals the pros and cons of any particular contract offer, empowering them to make best, data-driven business decision.
Stay on top of Medicare coding and payment rules

**2016 Medicare Enrollment Trainer**

MPB-ENROLL-16 | $269

MPB-RBRVS-16 | $184.95  
SHIPS DECEMBER

Get Medicare Part B payment indicators, RBRVS breakdown and fees arranged by code, deliver at-a-glance for every CPT® and HCPCS code to help you file cleaner more accurate claims fast.
Improve E/M coding accuracy, reduce risk

2016 E/M Bell Curve & Auditing Sourcebook
MPB-EMBELL-16 | $369
SHIPS NOVEMBER

This data-driven workbook and instructional guide helps you quickly identify irregular E/M billing patterns and target your chart auditing to ensure you are billing at proper levels to minimize compliance risk. Compare national Medicare statistics with your own E/M utilization and payer mix, focus your chart audits by targeting patterns that suggest over- or under-coding, improve physician documentation with real-world audit scenarios and sample notes. Bonus CD: generate E/M bell curve graphs by specialty with self-populating spreadsheets.

2016 E/M Coding & Billing Answers
MPB-EMCODANS-16 | $199
SHIPS NOVEMBER

Code and document E/M services (99201-99499) correctly and develop protocols to handle ambiguity in the guidelines that work in your internal compliance plan — before an external audit occurs. Includes detailed chart audit tools, real-life visit notes, tips and hints, plain-English definitions, even a skills test to validate your understanding of E/M coding rules.

E/M Documentation Quick Reference Card Set
MPL-EMCARD-16 | $69
SHIPS NOVEMBER

Uncertainty around the proper selection of E/M service codes is the most common cause of up coding and down coding exposing your practice to greater audit and OIG scrutiny.

Ensure the most appropriate level of service is selected and coded correctly with increased emphasis on the patient’s presenting problem. Each compliance-ready laminated card clearly — and quickly — spells out the rules for documentation complexity levels for easy reference. It’s the perfect pocket-reference for physicians!
Coding and compliance references designed to address specialty coding challenges

**2016 Pain Management Coding Answers**
MPB-PAINANS-16 | $169
